Brief Report on “Field Visit to Mahatma Gandhi Museum”

Date of Visit: 2 August 2024

Location: Mahatma Gandhi Museum, Rajkot

Organizer by: Instrumentation & Control Department, AVPTI

Participants: 1st SEM Students

Faculty Coordinator: Mr. M.S. Khokhar

Purpose of Visit: To gain insights into the life, principles, and contributions of Mahatma Gandhi through an interactive and educational experience at the museum as part of Orientation program for newly admitted students.

The Instrumentation and Control Engineering (IC) Department organized a field visit to the **Mahatma Gandhi Museum** in Rajkot to provide students with an opportunity to learn about Mahatma Gandhi's contributions to the nation and his philosophy of non-violence, truth, and self-reliance. This visit was designed to offer students an interactive learning experience, bridging historical knowledge with modern educational approaches.

The primary objectives of the field visit were:

- To enhance students' understanding of Mahatma Gandhi's life and principles.
- To inspire students by learning about the values of leadership, ethics, and social responsibility.
- To promote experiential learning outside the classroom, helping students reflect on historical events and their relevance to today's society.

The museum incorporates modern technology to enhance the learning experience. Interactive displays allow visitors to explore Gandhi's teachings in a hands-on manner. One notable exhibit was a touch-screen table that traced the timeline of India's freedom struggle, with interactive maps and videos providing additional context.

The field visit to the Mahatma Gandhi Museum was an enriching experience for the students of the Instrumentation and Control Engineering Department. It provided a unique blend of history, leadership, and ethical lessons, allowing students to reflect on how these values intersect with their academic and personal lives. The visit reinforced the importance of socially responsible engineering and leadership in shaping a better future for society.

The event concluded with a group photo in front of the museum, and students left with a renewed sense of purpose and a deeper appreciation for the legacy of Mahatma Gandhi.
